

The bigger choice

...the fastest delivery!

BRUCK[®]

THE BETTER CONNECTION

We have the stock f

This is absolutely unique! Stock flanges tailor made! We start where others have to quit. Our versatility and the highest quality standard secure the demand of our products and enable us to put flanges in different standards at our customers disposal direct from stock!

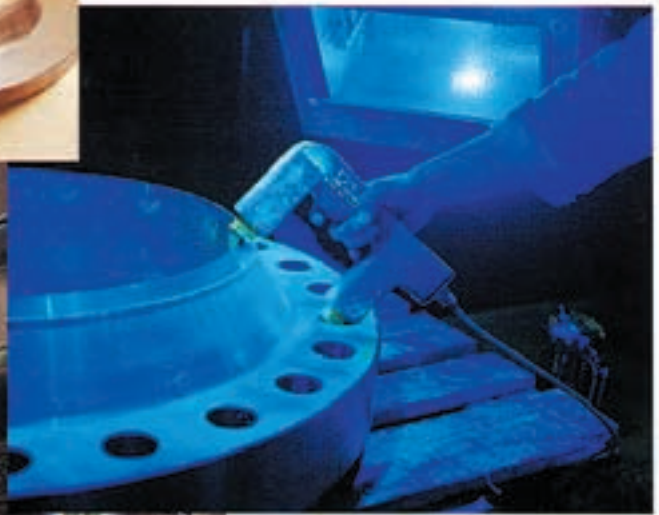

We can guarantee deliveries ex works within a week after placement of the order even if the flanges differ from standard.

Our own forge, heat treatment facilities and the variety of machining equipment especially our quality system with our own works- and third party (TÜV, Lloyds) inspection allow special requests, i.e. test temperature differing from standard, differing mechanical values, additional hot tensile testing, US, MPI or liquid penetrant testing by official qualified staff.

We produce even a new one within 1 week!

For you...

Our stock in larger quantities and material quality:

- Large diameter flanges in DIN (up to NB 2000, PN 10 and PN 16, material (22.8)
